The Red Eagle Foundation

Through donations and by attending these events you help young children lead a better and more purposeful life. Your help means that we can purchase vital equipment to empower children and give those with terminal illnesses and their families some fantastic memories.

See below for a couple of examples. For more details of how we help children please visit our website, www.redeaglefoundation.org

Leo has a very rare genetic condition called TBCD (Tubulin Folding Cofactor D) syndrome, a life threatening condition.

He was given a worst prognosis and the consultants did not expect him to live long. He is fully dependant on his family and therapy team.

Leo is 2 years old and needs full postural support in all positions - sitting, standing etc. He is on oxygen monitor and is on tube feeds as he has unable to eat and drink safely.

Leo has poor head control and trunk control and he practises therapy everyday. He has been assessed for a supportive walker, which worked very well, taking up some of his weight through his legs and holding his head up. Unfortunately, this specialist walker does not come under NHS provision.

We believe Leo must be given an opportunity to feel the sense of standing, shifting weight and move. This will open up his sensory-system and allow him to experience movement, vision, hearing and touch from a variety of perspectives.

The foundation were happy to help this lovely young boy to keep healthy, boost his morale and improve his confidence.

Henry has cerebral palsy. He is not able to balance very well and so cannot ride a two wheel bike. Henry was assessed at his local centre for a trike which he was able to ride with confidence.

Thanks to the support we receive from individuals and businesses we have been able to purchase this trike for Henry.

Henry's mum Amanda said "I wanted to thank you again for all Red Eagle has done for my son Henry and for us as a family. The Trike arrived on Friday afternoon and as soon as the rain stopped Henry was straight on it. He was like a duck to water. I think the smile in the photo says it all!"
